Wisconsin Mapping Bulletin

Volume 2, No.1 January 1976

Information on Cartographic activities and Aerial Photographic coverage in the State of Wisconsin; published periodically by the State Cartographer's Office, 144 Science Hall, University of Wisconsin, Madison, Wisconsin 53706.

Earth Science Maps of Wisconsin

The publication Earth Science Maps of Wisconsin, 1818-1974 is now available in limited distribution from the State Cartographer's Office. This bibliography of Wisconsin earth science maps is part of a larger work, Bibliography and Index of Wisconsin Geology, 1698-1974 whose compilation is being sponsored by the Wisconsin Geological and Natural History Survey. This publication includes only those maps which were separately issued or were the subject of a publication. Maps that were illustrations or supplements to books or journal articles are not listed. Topographic maps of the U.S. Geological Survey are also not listed. Requests for single copies of Earth Science Maps of Wisconsin, 1818-1974 should be directed to Ms. Chris Hanson, 144 Science Hall, Madison, WI 53706, phone (608) 262-3065.

Order Topographic Maps by Sheet Name!

Several previous issues of the Wisconsin Mapping Bulletin may have caused some confusion when individuals ordered topographic maps by the alpha or numerical coding shown in the Bulletin. Due to the size limitation of the printing of the Bulletin, the physical location of the new map production is indicated by a numeric code and the name of that map is shown in the adjoining space with its quadrant, NE¼, NW¼, SW¼, or SE¼, (see Bulletin, Vol. 1, No. 3 for an example).

Since this coding is only a means to convey information, the personnel selling maps have difficulty in filling an order for No. 10 SW¼. Please order by the name listed, Eau Claire East for example. Your cooperation will be appreciated.
