1. When providing GIS data, does your organizational policy vary level of access* according to the following criteria:
*By level of access, we mean varying fee, copyright, license or restricting redistribution?

Data theme requested: [check all that apply]

- parcel mapping
- parcel tabular data
- personally identifiable information
- land survey /geodetic control
- digital orthophotos
- digital elevation models
- address information
- sensitive information

2. Other:

3. Type of requestor? [check all that apply]

- local government
- state government
- federal government
- academic
- private sector
- public utility

4. Other:

5. Intended purpose? [check all that apply]

- personal use
- non-commercial use
- commercial use
- academic use
- national security
- emergency management

6. Other:

7. Do these digital spatial data policies affect: [check all that apply]

- Geospatial data exchange / transfer?
- On-line access?
- Hardcopy products?

8. Other:

9. Is your data exchange policy mandated by: [check all that apply]

- internal agency policy
- corporate counsel
- governmental board policy
- county or municipal ordinance
- state legislation
- federal legislation

10. Other:

**11. Does your organization restrict access over the Internet to personally identifiable information contained within digital spatial data or land records?
[check all that apply]**

- Do not restrict access to any information.
- Restrict access only for demonstrated need for personal safety, such as judges, police or victims.
- Restrict access of any individual upon written request.
- Restrict the publication of all personal information for all individuals.
- Provide online public access to non-personal information and secure access to personal information
- Restrict searches using personal information such as names, but publish the information that results

12. Other restrictions, please specify:

13. Would your organization be willing to contribute data/metadata to a statewide digital spatial data discovery/access program?

- Yes
- No
- Unknown

14. Would your organization allow other government entities (e.g., Wisconsin Emergency Management, FEMA) to use your digital spatial data for emergency management related planning, response and recovery activities?

- Yes
- No
- Unknown

15. If yes, would you require a signed agreement?

- Yes
- No
- Unknown

16. Does your agency have an established policy for permanent off site backup and archiving?

17. Please provide an alternate point of contact for access to your geospatial data, in the event the primary contact is unavailable (name, title, agency, address, phone, email).

18. Is there an online location that permits access to the many City / Village / Town / County land use and/or comprehensive plans and maps for your geography?

- Yes
- No
- Unknown

19. If yes, provide URL

20. Does your agency have an existing land use map in digital form?

- Yes
- No
- Unknown

21. What year does it represent?

22. Does your agency have a map of future land use in digital form?

- Yes
- No
- Unknown

23. What year (publication) does it represent?

24. Does your agency follow a standardized land use coding scheme for mapping?

- American Planning Association (APA) Land Based Classification System (LBCS)
- NAICS
- SEWRPC
- ECRPC
- custom
- unknown

25. What is the total number of parcels maintained by your organization? (include tax-exempt as well as taxable parcels)

26. Are there other agencies whose parcels are not included in the above number within your geography (e.g. City within County)?

- Yes
- No
- Unknown

27. Please list them and point of contact.

28. What percentage of the total number of parcels maintained by your agency is available in digital form?

29. Of parcels in digital form maintained by your agency, what % are best described as Index Parcel Mapping?

(Please Refer to: WLIB Digital Parcel Mapping Standard

http://www.doa.state.wi.us/dir/documents/WLIP_ParMapSt_WLIB_Format.pdf)

30. Of parcels in digital form maintained by your agency, what % are best described as Cadastral Parcel Mapping?

(Please Refer to: WLIB Digital Parcel Mapping Standard

http://www.doa.state.wi.us/dir/documents/WLIP_ParMapSt_WLIB_Format.pdf)

31. Does your parcel mapping follow the FGDC Cadastral Data Model (also known as Nancy von Meyer's or the ESRI Parcel Geodatamodel)?

- Yes
- No

32. If not, is there a link to other documentation of your Parcel data model?

33. What are the available publication format(s) for Parcels?

- AutoCad (.dwg)
- Autodesk Data Interchange
- ESRI Coverage File
- ESRI Export File
- ESRI Shapefile
- ESRI Ungenerate
- Geodatabase
- Intergraph (.dgn)
- MapInfo Data Transfer (mid/mif/dat)
- Maptitude (.edf/.dbd)
- Oracle SDO Geometry
- No Distribution

34. Other:

35. *The next 7 questions are intended for county agencies that maintain PLSS corner information*

How many PLSS corners (section, 1/4, meander) are in your county?

36. What percent of your PLSS corners in your county have been remonumented?

37. What percent of your PLSS corners have been assigned local coordinates, tied to your primary geodetic network?

38. What percent of your PLSS corners have digital tie sheet documents?

39. If digital tie sheet documents are accessible online, is there a URL/website address from which to access them?

40. Of those PLSS corners with local coordinate values, what percent have been integrated into the current version of the digital parcel map?

41. Does your county use a particular spatial indexing system for PLSS corners? (i.e., Romportl system; WDNR Landnet system; none; other)

42. Are you the most appropriate person in your agency or county to answer questions related to geodetic control, network densification, PLSS remonumentation and coordinate systems?

- Yes
- No
- Unknown

43. If not, please provide the appropriate contact's name, position, phone number, and email.

44. Has your agency or county developed a densified horizontal geodetic control network using the Wisconsin High Accuracy Reference Network (HARN)

- Yes
- No
- Unknown

45. If yes, were the horizontal control stations submitted to the National Geodetic Survey (NGS) for inclusion in their national database?

- Yes
- No
- Unknown

46. Has your agency or county developed a densified vertical geodetic control network based on the National Spatial Reference System (NSRS)?

- Yes
- No
- Unknown

47. Is this vertical network mathematically tied to the WisDOT Height Modernization network monuments?

- Yes
- No
- Unknown

48. Does your agency/office have a need for access to a Continuously Operating Reference System (CORS) GPS Base Station or Network for Real Time Kinematic (RTK) surveying?

- Yes
- No
- Unknown

49. If yes, please briefly explain the applications.

50. Does your organization plan to adopt the new Wisconsin Coordinate Reference System (WISCRS) county coordinate systems?

- Yes
- No
- Unknown

51. Do you jointly maintain any GIS data themes with another jurisdiction or organization (e.g. county-municipal, county-county, county-regional, and county-utility)? If so, please describe and list participants.

52. Do you publish your agency's GIS data through another organization's mapping portal? If so, whose site? and under what maintenance/update plan ?

53. If you have a mapping portal/website, was it developed in-house or under contract?

- in-house
- contract
- both
- unknown

54. Is it hosted in-house or remotely (e.g. agency IT shop vs. developer hosting service)?

- in-house
- remote hosting
- unknown

55. What is your most successful GIS/land records application, and why?

56. Are you aware of plans within your jurisdiction to build applications using commercial web mapping services (e.g. Google Maps, Google Earth, MSN Virtual Earth, etc.)? Please explain.

57. What are your organization's top three educational priorities for the next year?

save
