

Wisconsin Geographic Information Coordination Council (WIGICC)

Statewide Network Meeting

Tuesday, October 28th, 9:00 AM – 4:00 PM

Radisson Paper Valley Hotel, Appleton

The interim Wisconsin Geographic Information Coordination Council (WIGICC) is a newly formed organization that serves as the primary forum and statewide coordinating body for geographic information and technology. WIGICC held its first meeting recently on Sept. 23rd.

We are now ready to kick-off another critical component of WIGICC, a vibrant statewide stakeholder "Network". The Network will identify issues and make recommendations to the Council on actions and policies relating to statewide geospatial initiatives. We envision that the Network will reach beyond traditional areas into themes such as emergency management, economic development, education, and health care.

Please attend the Network meeting in Appleton, learn more about WIGICC, and how you can have a voice in statewide coordination efforts. The meeting agenda is attached.

Please register for this event by sending an email with your name, organization, and contact information to wigicc-admin@lists.wi.gov

Registration allows us to plan ahead, but walk-ins are welcome. There is no cost to attend.

With your registration, we would greatly appreciate an indication of whether you have specific interests in discussion/action groups related to any of the following (fill in as many as desired):

A. Geographic location or region: _____

B. Application domains: _____

(e.g., Emergency Management, Health Care, Business Geographics, Parcels/Cadastral, Transportation, and more)

C. Level of government: _____

(e.g., municipal, county, state, federal, tribal)

D. Technical theme: _____

(e.g. data models, standards, technologies, etc.)

E. Data policy: _____

(e.g., data sharing, copyright, cost-recovery, privacy, open records, etc.)

F. Other general category: _____

For more information about WIGICC and the stakeholder Network, please visit:
