

PLANETWALKING TO CRIME FIGHTING

SATURDAY SCIENCE AT DISCOVERY

Traducción Disponible

Charting New Directions with Global Information Systems

Saturday, November 5 • 10am

Ride our trolley running nonstop to and from
Madison Children's Museum 9:30 am–12:30 pm

GIS, the integration of digital mapping with data, is changing how we make decisions about everything from building houses to monitoring health trends to fighting fires.

Meet Planetwalk founder John Francis, an environmentalist and UN Goodwill Ambassador, who stopped talking for 17 years and using motorized vehicles for 22.

Join UW–Madison scientists for presentations and hands-on activities designed to introduce kids and adults to the dynamic world of GIS.
